

PROBLEM STATEMENT #60 | Media, Events & Community

Podcast Guest Scheduling & Outline Builder

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow guests to select interview time slots and submit structured bullet points for discussion topics with biography links.	High	Pass: Slot booked, calendar invite sent, and topic outline attached to episode board; Fail: Booking permitted on blocked dates.	Core booking and data collection functionality.
FR-002	Functional	The system shall allow the Show Host to share booking availability by defining open dates and times on a calendar.	High	Pass: Host can save available slots and they appear on the guest portal; Fail: Slots overlap.	Necessary for guests to know when to book.
FR-003	Functional	The system shall generate timestamped run-of-show episode production notes from the collected guest outlines.	High	Pass: System outputs a single document containing time blocks and topics.	Essential for episode production.
FR-004	Functional	The system shall allow a Podcast Guest to cancel a previously booked time slot.	Medium	Pass: The cancelled slot immediately becomes available for others to book.	Provides flexibility for changing schedules.
FR-005	Functional	The system shall allow the Show Host to review and	Medium	Pass: Host modifications are	Ensures topics align with the host's vision.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
		manually edit a guest's submitted talking points.		saved and reflected in the final outline.	
NFR-001	Nonfunc.	The show outline generator must compile submitted guest topics into a formatted PDF production sheet in under 1 second.	High	Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.	Ensures quick service for the host.
NFR-002	Nonfunc.	The system shall transmit all scheduling and guest data over an encrypted HTTPS connection.	High	Pass: Network monitoring confirms no plaintext data transmission.	Protects personal data from interception.

Use-Case Flow Specification

Use Case: Book Interview Slot

Use Case ID: UC-02

Primary Actor: Podcast Guest

Supporting Actor: Calendar Service

Preconditions

1. The Podcast Guest has access to the podcast scheduling system.
2. The Show Host has configured available interview time slots.
3. At least one interview slot is available for booking.

Postconditions

1. The selected interview slot is successfully booked.
2. The booking details are stored in the system.
3. A calendar invitation is sent to the Podcast Guest and Show Host.

Main Success Scenario

1. The Podcast Guest opens the interview scheduling page.
2. The system displays the available interview time slots configured by the Show Host.
3. The Podcast Guest selects a preferred interview time slot.
4. The system checks whether the selected slot is still available.
5. The system displays the selected booking details for confirmation.
6. The Podcast Guest confirms the selected interview slot.
7. The system creates and stores the interview booking.
8. The system sends the booking details to the Calendar Service.
9. The Calendar Service creates a calendar invitation for the Podcast Guest and Show Host.
10. The system displays a booking confirmation to the Podcast Guest.
11. The use case ends successfully.

Alternate Flow – Selected Slot Is Unavailable

4a. Selected Interview Slot Is No Longer Available

1. The system detects that the selected interview slot has already been booked or blocked.
2. The system displays a message informing the Podcast Guest that the selected slot is unavailable.
3. The system displays the currently available interview slots.
4. The Podcast Guest selects another available slot.
5. The system continues from Step 4 of the Main Success Scenario.

Alternate Flow – Calendar Invitation Failure

9a. Calendar Service Is Unavailable

1. The Calendar Service fails to create or send the calendar invitation.
2. The system retains the confirmed interview booking.
3. The system informs the Podcast Guest that the booking was successful but the calendar invitation could not be sent.
4. The system displays the confirmed interview date and time.
5. The booking remains stored in the system for later calendar-invitation retry.
