

PROBLEM STATEMENT #60 | Media, Events & Community

Podcast Guest Scheduling & Outline Builder

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow guests to select interview time slots and submit structured bullet points for discussion topics with biography links.	High	Pass: Slot booked, calendar invite sent, and topic outline attached to episode board; Fail: Booking permitted on blocked dates.	Core booking and data collection functionality.
FR-002	Functional	The system shall allow the Show Host to share booking availability by defining open dates and times on a calendar.	High	Pass: Host can save available slots and they appear on the guest portal; Fail: Slots overlap.	Necessary for guests to know when to book.
FR-003	Functional	The system shall generate timestamped run-of-show episode production notes from the collected guest outlines.	High	Pass: System outputs a single document containing time blocks and topics.	Essential for episode production.
FR-004	Functional	The system shall allow a Podcast Guest to cancel a previously booked time slot.	Medium	Pass: The cancelled slot immediately becomes available for others to book.	Provides flexibility for changing schedules.
FR-005	Functional	The system shall allow the Show Host to review and	Medium	Pass: Host modifications are	Ensures topics align with the host's vision.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
		manually edit a guest's submitted talking points.		saved and reflected in the final outline.	
NFR-001	Nonfunc.	The show outline generator must compile submitted guest topics into a formatted PDF production sheet in under 1 second.	High	Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.	Ensures quick service for the host.
NFR-002	Nonfunc.	The system shall transmit all scheduling and guest data over an encrypted HTTPS connection.	High	Pass: Network monitoring confirms no plaintext data transmission.	Protects personal data from interception.
